## 352Y. Computational techniques

Initial flow state of a broken dam, J Hydrodyn 6(1) 69-73 (1994), 1T936

unrerical modeling and computation of fluid pressure transients with air entrainment in pumping installations, Int J Numer Methods Fluids 19(2) 89-103 (Jul 1994), 1A937

rediction of beach changes by a new 2-D empirical eigenfunction model, Coastal Eng 23(3-4) 255-270

Equivalent differential equations in fixedcharacteristics method, J Hydraul Eng 120(10) 1159-1175 (Oct 1994), 3A262

Predictive control method to operate water gate dam, Int J Comput Fluid Dyn 2(3-4) 217-241 (1994), 3T905

(1994), 31903 radient method of optimal control applied to the operation of a dam water gate, Int J Numer Methods Fluids 19(6) 463-477 (Sep 1994), 3A910

ransformed nonparametric flood frequency analysis, J Comput Math 12(4) 330-338 (Oct 1994), 4A927 a submerged shelf without breaking, Coastal Eng 24(1-2) 1-22 (Nov 1994), 5T848

24(1-2) 1-22 (Nov 1994), 5T848 pproximation of shallow water equations by Roe's Riemann solver, Int J Numer Methods Fluids 20(2) 157-168 (Jan 1995), 6A;909 omputer Modeling of Free-Surface and Pressurized Flows - Proceedings of the NATO Advanced Study Institute Pullman, WA June 28 - July 9, 1993 (Kluwer, Norwell MA, 1994) 7N30 Finite volume solver for the sha

in varying bod environments, Int J Comput Fluid Dyn 3(3-4) 233-250 (1994), 7T254 mensional numerical modeling of water and ent flow in a sand trap, J Hydraul Res 32(6)

833-844 (1994), 7T959 avier-Stokes equations with imposed pressure and velocity fluxes, Int J Numer Methods Fluids 20(4)

(Feb 1995), 7A1004 imulation of free surfaces in 3D with the arbitrary Lagrange-Euler method, Int J Numer Methods Eng 38(5) 717-734 (Mar 1995), 8A271

ransmitting boundary conditions for 1D numerical computational schemes, Hydro-Tech Transactions 57 3-33 (1994), 9A953

bitic-spline boundary integral method for 2D free-surface flow problems, Int J Numer Methods Enj 38(11) 1809-1830 (Jun 1995), 10A250

of fuzzy controller for efficient iterative Comp Assisted Mech Eng Sci 1(3-4) 233asibility of fuzzy commethod, Comp Assis 242 (1994), 10A912

ochastic response of storage function model (Japanese), Proc JSCE 515(II-31) 1-11 (May 1995), 11A272

Surrerical simulation of compound open channel on turbulence with a Reynolds stress model (Japanese), Proc JSCE 515(II-31) 55-65 (May 1005) 11-007 1995), 11A997

crical analysis method for groundwater flow in a mation with spatially variable hydraulic conducformation with spatially variable hydraulic conditivity (Japanese), Proc JSCE 517(III-31) 83-92 (Jun 1995), 12A979

numerical study of piston-driven unsteady flow in a pipe with sudden expansion, Int J Numer Method: Fluids 21(3) 237-251 (Aug 1995), 12A980

## 352Z. Experimental techniques

Flume experiments on the crosion of till shores by waves, Coastal Eng 23(3-4) 329-348 (Jul 1994), 2A889 tethods for measuring discharge under ice cove Hydraul Eng 120(11) 1327-1336 (Nov 1994).

ediment removal with a siphon at critical flux, J Hydraul Res 32(6) 845-860 (1994), 7T958

Laser quadrant detection technique for capillary wave measurements, Opt Lasers Eng 22(1) 53-64 (1995), 7A961

7A961

Measurements and Advancements in Hydraulic Measurements and Experimentation - Proceedings of ASCE's Hydraulics Division Symposium, Buffalo, NY, August 1-5, 1994 (ASCE, 1994)

#### 380E. Turbines (hydraulic)

Development of new cascades with profiles of variable geometry for application in inlet and exit guide vanes of swirl controlled turbomachines - Part II (German), Forschung Ingenieur 60(6) 133-153 (Jun 1994), 2T1004

perimental investigation of cross-flow turbine eff ciency, J Fluids Eng 116(3) 545-550 (Sep 1994),

Micro torque measurements for a prototype turbine, J Micromech Microeng 4(3) 129-139 (Sep 1994),

Pyrometry for turbine applications in the presence of reflection and combustion, J Propulsion Power 10(6) 911-912 (Dec 1994), 4A1092

essign and performance of vancless volutes for radial inflow turbines - Part 3: Experimental investigation of the internal flow structure, Proc Inst Mech Eng of the internal flow structure, Proc In A 208(A4) 295-302 (1994), 5A1100

Erosion of dust-filtered helicopter turbine engines -Part I: Basic theoretical considerations, J Aircraft 32(1) 106-111 (Feb 1995), 6A1142

rosion of dust-filtered helicopter turbine engines -Part II: Erosion reduction, J Aircraft 32(1) 112-117 (Feb 1995), 6A1143

J Aircraft 32(1) 118-123 (Feb 1995), 6A1144

ent objectives and methods of experir research on cavitation, Forschung Ingenieur 60(11-12) 317-322 (Dec 1994), 7A1129

New formulae for scaling-up hydraulic efficiency of hydraulic turbines, J Hydraul Res 33(2) 147-162 (1995), 9T1061

### 380F. Propellers in liquids

Effect of blade sweep on the reduction and en ment of supersonic propeller noise, J Fluid Mech 293 181-206 (Jun 1995), 12A298

### 380G. Cavitation effects

Correlation of leakage vortex cavitation in axial-flor pumps, J Fluids Eng 116(3) 551-557 (Sep 1994), 3A1126

ce of cavitation on blade characteristics, Exp Fluids 17(6) 441-445 (Oct 1994), 5A1101 Present objectives and methods of experimental research on cavitation, Forschung Ingenieur 60(11-12) 317-322 (Dec 1994), 7A1129

High-speed stereo-observations of violent vibra associated with three types of cavitation, JSM J Ser B 38(1) 66-72 (Feb 1995), 7A1130

ind Energy 1995 - Energy-Sources Technolo Conference and Exhibition, Houston, Texas,

January 29 - February 1, 1995 (ASME Press, New York, 1995) 8N35

Effect of hydrofoil planform on tip vortex roll-up cavitation, J Fluids Eng 117(1) 162-169 (Mar 1995), 8A1080

on of analysis and experiment for cavitation free flow along and past a single blade, J Hydraul Res 33(1) 3-16 (1995), 8A1099 ts in the dynamic respon cavitating LE-7 liquid oxygen pump, J Propu Power 11(2) 330-336 (Apr 1995), 8A1100

### 380H. Centrifugal fans. pumps, compressors

Computation of cross coupling stiffness in a whirling pump, Comput Methods Appl Mech Eng 117(1-2) 181-194 (Jul 1994), 1A1091

ressure and temperature distortion testing of a two stage centifugal compressor, J Eng Gas Turbines Power 116(3) 567-573 (Jul 1994), 1A1092

al vs experimental rotordynamic incompressible flow labyrinth seals, J Propuls ower 10(5) 721-728 (Oct 1994), 2A828

nic effects of the shroud-to leakage flow in centrifugal pumps, J 116(3) 558-563 (Sep 1994), 3A1127 os, J Fluids Eng

Flow physics leading to system instability in a centrifugal pump. J Turbornachinery 116(4) 612-620 (Oct 1994), 4A1093

Fluid vibration induced by a pump, J So 177(3) 337-348 (Oct 1994), 4A1094 p. J Sound Vib

NASA-GE fan and compressor research accom-plishments, J Turbornachinery 116(4) 555-569 (Oct 1994), 4A1095

1994), 4X1095
umerical simulation and experimental investigation
of compression of two-stage, very high pressure
reciprocating gas compressors, Proc Inst Mech Eng reciprocating gas compressors, Proc C 208(C5) 287-298 (1994), 4A1096

Review of research on turbornachinery at MIT traccable to support from Mel Hartmann, J Turbornachinery 116(4) 570-580 (Oct 1994),

Thermal tip clears ce control for ce compressor of an APU engine, J Turbs 116(4) 629-634 (Oct 1994), 4A1098

leakage flow in linear compressor cascade, J Furbornachinery 116(4) 657-664 (Oct 1994),

stall in an incompressible flow centrifugal com-pressor with vaned diffuser, Int J Turbo Jet Engine 11(2-3) 229-242 (1994), 5A1102

Role of dissipation characteristics in predicting fl from dissimilar centrifugal pumps, Proc Inst M Eng A 208(A4) 285-294 (1994), 5A1103 pplication of sweep to improve the efficie transonic fan - Part I: Design, J Propulsie 11(1) 49-54 (Feb 1995), 6A1145

intic element calculations and experimental verification of the unsteady potential flow in a centrifugal volute pump, Int J Numer Methods Fluids 19(12) 1083-1102 (Dec 1994), 6A1146

Prestall behavior of several high-speed compressors, 2 Turbomachinery 117(1) 62-80 (Jan 1995), 6A1147 Rotating stall acoustic signature in a low-speed centrifugal compressor - Part 1: Vancless diffuser, J

Turbornachinery 117(1) 87-96 (Jan 1995), 6A1148 dimensional flow in a highly loaded single-stronic fan, J Turbomachinery 117(1) 22-28 (January 117(1) 22-28 (J

Centrifugal pump transient characteristics and and using the method of characteristics, Int J Mech 37(1) 77-89 (Jan 1995), 7A1131

ers, JSME Int J Ser B 38(1) 25-30 (Feb 1995), 7T1132

Effect of flow rate on ch

1995), 711132 entrifugal pump performance during transient operation, J Fluids Eng 117(1) 123-128 (Mar 1995), 8A1101 Fluid structure interacti

centrifugal pumps, Trib Trans 38(2) 353-363 (Apr 1995), 8A1102 fluence of swirl brakes on the rotordynamic forces

generated by discharge-to-suction leakage flows centrifugal pumps, J Fluids Eng 117(1) 104-108 (Mar 1995), 8A1103

vestigation of centrifugal pump performance und two-phase flow conditions, J Fluids Eng 117(1) 129-137 (Mar 1995), 8A1104

Proposed design package for centrifugal impellers, Comput Struct \$5(2) 347-356 (Apr 1995), \$A1105 Relationship between unsteady flow, pressure fluctuations, and noise in a centrifugal pump - Part

A: Use of PDV data to co e of PDV data to compute the pressure fields Eng 117(1) 24-29 (Mar 1995), 8A1106 J Fluids Eng 117(1) 24-29 (mar : pressure Relationship between unsteady flow, pressure fluctuations, and noise in a centrifugal pump - Part B: Effects of blade-tongue interactions, Eng 117(1) 30-35 (Mar 1995), 8T1107

Theoretical evaluation of the effects of the impe entrance geometry and of the incident angle on cavitation inception in centrifugal pumps, Pre Mech Eng C 209(C1) 29-38 (1995), 8A1108

sient and steady state dynamic behavior of single linder compressors: Prediction and experiments, and Vib 181(1) 23-41 (Mar 1995), 8A1109

Design and development of an advanced two centrifugal compressor, J Turbomachinery 117(2) 205-212 (Apr 1995), 9A1062

imulation of the unsteady interaction of a centrifu impeller with its vaned diffuser. Flow analysis, J Turbomachinery 117(2) 213-222 (Apr 1995).

rige instability in a distributed parameter radial compression system, Meccanica 30(1) 37-52 (Feb 1995), 9A1064

1993), 9A1064 orrelation and prediction of efficiency of centrifugal pumps due to tip clearance effects, Proc Inst Mech Eng A 209(A2) 111-114 (1995), 11A1130 elasticity of aeronautical compressors: Prote of art and recommendations (French), ancaise Mec 8(2) 77-86 (1995), 12A271

### 380l. Axial fans, pumps, compressors

Second-law analysis of vapor con pumps with solution circuit, J Eng Gas Turl Power 116(3) 453-461 (Jul 1994), 1T1126

haracterization of abrupt rotating st axial flow compressor, J Propulsio 709-715 (Oct 1994), 2A1107

ompressor unsteady aerodynamic res ing stall and surge excitations, J Pro 10(5) 698-708 (Oct 1994), 2A1108

orrelation of leakage vortex cavitation in axial-flow pumps, J Fluids Eng 116(3) 551-557 (Sep 1994), 3A1126

luid vibration induced by a pump, J Sound Vib 177(3) 337-348 (Oct 1994), 4A1094 oximate analysis and prediction method for tip

ent of a new front stage for an ind axial flow compressor, J Turbo 597-604 (Oct 1994), 4A1101

evelopment of a transonic front stage of an axial flow compressor for industrial gas turbines, J Turbomachinery 116(4) 605-611 (Oct 1994),

Endwall effects at two tip clearances in a multistage axial flow compressor with controlled diffusion blading, J Turbomachinery 116(4) 635-647 (Oct

1994) 4A1103

J994), 4A1103.

Numerical solutions of 2D multistage rotor-stator unsteady flow interactions, J Propulsion Power 10(6) 876-883 (Dec 1994), 4A1104

Results of NASA-Iowa State University research on axial-flow pumps, J Turbomachinery 116(4) 581-383 (Oct 1994), 4A1105

otodynamic Pump Design (Cambridge UP, New York, 1994) 6R27

in multistage axial compressors, J Turbomachinery 117(1) 81-86 (Jan 1995), 6A1150

Design, selection, and application of oil-free screw compressors for fuel gas service, J Eng Gas Turbines Power 117(1) 74-80 (Jan 1995), 7T1133

Design, selection, and application of oil-injected screw compressors for fuel gas service, J Eng Gas Turbines Power 117(1) 81-87 (Jan 1995), 7T1134

Sign, selection, and application of reciprocating compressors for fuel gas services, J Eng Gas Turbines Power 117(1) 88-93 (Jan 1995), 7T1135 ethod for estimating various operating states in a tethod for estimating various operations single-stage axial compressor, J Prop 11(2) 385-387 (Apr 1995), 8A1110 odeling and simulation of perating s

lodeling and simula displacement tion of an axial piston variabl placement pump with pressure control, Mechine Theory 30(4) 599-612 (May 1995).

Three-dimensional interactions in the rotor of an axial turbine, J Propulsion Power 11(2) 196-204 (Apr 1995), 8A1112

cating Pump: Theory, Design, and Use and Edition (Krieger, Melbourne FL, 19

sperimental investigation of the flow in diffusers behind an axial flow compressor, J Turbomachinery 117(2) 231-239 (Apr 1995), 9A1065

New method of thermodynamic computation for a reciprocating compressor: Computer simulation working process, Int J Mech Sci 37(4) 343-353 (Apr 1995), 9A1066

for predicting performance of axial-flo or, Int J Turbo Jet Engines 12(1) 21-28 (1995), 10A1140

econdary flow in repeating stages of axial turboms chines, Proc Inst Mech Eng A 209(A2) 101-110 (1995), 11A1131

#### 380J. Compressibility effects

Shock Wave Engine Design (Wiley, New York, 1995)

Compression of fuel gas for turbines, engines, and boilers in cogeneration plants, J Eng Gas Turbin Power 117(1) 67-73 (Jan 1995), 7A1313

### 380K. Mixed flow fans. pumps, compressors

ression of mixed-flow pump instability and surge the active alteration of impeller secondary flows, the active alteration of impeller secondary fl Furbomachinery 116(4) 621-628 (Oct 1994), 4A1106

Measurement and analysis of static pressure field in torque converter pump, J Fluids Eng 117(1) 109-115 (Mar 1995), 8A1113

Navier-Stokes analysis of the pump flow field of an automotive torque converter, J Fluids Eng 117(1) 116-122 (Mar 1995), 8A1114

imple first-order models for surging in pump and compressor systems, Proc Inst Mech Eng C 209(C3) 149-154 (1995), 12A1127

### 380L. Rotor and inducer blading

Chaotic behavior of rotor-stator systems with rubs, J Eng Gas Turbines Power 116(3) 692-701 (Jul 1994), IA115

Curve veering and flutter of rotating blades, J Eng Gas Turbines Power 116(3) 702-708 (Jul 1994),

ents of wake-induced u

flow in a linear turbine cascade, Exp Fluids 17(1-2) 45-58 (Jun 1994), 1A 1094 elative flow and turbulence measurements within and downstream of an axial flow rotor, Exp rmal Fluid Sci 9(2) 186-196 (Aug 1994).

# AUTHOR INDEX FOR VOLUME 48 (1995)

References to AMR (at the end of each entry) are coded in the form nLm, where n is an integer which gives the AMR issue number (1 for Jan, 2 for Feb, etc), L is a letter (R, N, A, or T), and m is the sequence number of the item within the issue. If L = R or N, the item is in the BOOK REVIEWS section with R indicating a signed Review and N a staff-prepared Note. If L = A or T, the item is in the REVIEW OF THE JOURNAL LITERATURE section with A indicating that an abstract is given and T that only the title of the article is given. Under each author's name the entries are listed alphabetically by title.
